

Junhao Liu

East Asian Observatory
660N, Aohoku Place, Hilo, HI 96720, USA
✉ Email: liujunhao42@outlook.com, j.liu@eaobservatory.org
📄 liujunhao-astro.github.io
Birth Year: 1993

Research Interests

- Magnetic fields and dust polarization in star formation regions
- Initial condition of star formation in massive infrared dark clouds and low-mass starless cores.
- Magneto-hydrodynamic (MHD) turbulence in self-gravitating media
- Jets and outflows associated with star formation activities.

Employment

2023/09- **Project Research Fellow**, National Astronomical Observatory of Japan (NAOJ), Mitaka, Tokyo, Japan. Host: Prof. Patricio Sanhueza.

2021/06- **EAO Fellow**, East Asian Observatory (EAO), Hilo, Hawaii, USA.
2023/08

Research Experience

2018/08- **SAO pre-doctoral Fellow**, Center for Astrophysics (CfA) | Harvard & Smithsonian, Cambridge, Massachusetts, USA. Supervisor: Dr. Qizhou Zhang.

Education

2015/09- **Ph.D. in Astronomy**, Nanjing University, Nanjing, Jiangsu, P.R. China. Supervisor: Prof. Keping Qiu.

2011/09- **B.S. in Astronomy**, Nanjing University, Nanjing, Jiangsu, P.R. China.
2015/06

Skills

Programming Python

Software CASA, STARLINK, IDL/MIR, MIRIAD, POLARIS, RADEX, GILDAS

Data reduction&imaging SMA, ALMA, JCMT, IRAM-30m, Tianma-65m, PMO-13.7m

Approved PI Proposals

* **JCMT**: 104.3 hours allocated and 80.8 hours observed.

2022 "Deviation from turbulence cascade in NGC 6334". M23AD001.

2018-2022 "Dust polarization survey of massive dense cores in Cygnus-X". M18BP047, M19BP037, M20AP048, M22AP019, and M22BP047.

2022 "Dust polarization survey of IRDCs". M22AD003.

2021 "Are sub-virial clumps in IRDC G28.34 supported by magnetic fields?". M22AP018.

2019 "Does Magnetic Field Suppress Star Formation in Galactic Center Massive Clouds?". M20AP023.

- * **SMA**: 19 tracks allocated and 6 tracks observed; 1 track is about 6-10 hours
- 2019-2023 "Dust polarization survey of massive dense cores in Cygnus-X". 2019B-S028, 2021A-S008, 2022A-S040, and 2023A-S011.
- * **ALMA**: 30.6 hours allocated and 1.5 hours observed.
- 2021 "Dust polarization survey of massive dense clumps in IRDCs". Cycle 8: 2021.1.01083.
- 2021 "Dust polarization survey of dense cores in IRDC G28.34: are magnetic fields aligned with outflows?". Cycle 8: 2021.1.01091.S.

Participated Large Programs

- 2016-now "B-Fields in STar-Forming Region Observations (BISTRO)". JCMT large program. PI: Derek Ward-Thompson.

Honors and Grants

- 2022 Outstanding Young Scholar for the Molecular Clouds and Star Formation Colloquium
- 2021-2023 EAO Fellowship. Research funds 5000 USD per year
- 2018-2021 SAO pre-doctoral fellowship
- 2013 Jiangsu province undergraduate innovation and entrepreneurship training program. Grants 8000 CNY (~1200 USD)

Observation Experience

- 2021/12 IRAM-30m remote observation. 1 night.
- 2018/02 Tianma-65m on-site observation. 5 days. Shanghai, China
- 2017/09 JCMT on-site observation. 7 nights. Mauna Kea, HI, US
- 2015/06 CSO remote observation. 5 days.

Recent Academic Activities

- 2022/11 Seminar Talk. SWIFAR Seminar at Yunnan University (remote), Kunming, China
- 2022/09 Seminar Talk. KIAA-DoA Seminar at Peking University (remote), Beijing, China
- 2022/08 Conference Talk. Molecular Clouds and Star Formation Colloquium in Nanjing (remote), China.
- 2022/02 Seminar Talk. Shanghai Astronomical Observatory in Shanghai (remote), China
- 2021/07 Seminar Talk. EAO Science Seminar in Hilo (remote), USA
- 2021/06 Conference Talk. SOFIA/JCMT Magnetic Fields and the Structure of the Filamentary Interstellar Medium Online Workshop (remote)
- 2021/03 Flash Talk. IAU Symposium 360 ASTROPOL2020 in Hiroshima (remote), Japan
- 2019/11 Flash Talk. Harvard-Heidelberg Workshop on Star Formation in Cambridge, USA
- 2019/05 Poster Talk. Workshop on Polarization in Protoplanetary Disks and Jets in San Cugat, Spain
- 2018/08 Conference Talk. Molecular Clouds and Star Formation Colloquium in Lhasa, China

Services

- Reviewer of JCMT and ALMA proposals.

- 2021-2023 EAO fellow's JCMT-related duties (50% of time): technical assessment of submitted proposals, data quality check, monitoring the performance of heterodyne instruments, user support, code maintenance for the large-program prediction model, monitoring JCMT publications, and updating the publication tracking database.
- 2021-2023 Organizer of EAO science seminars.
- 2022 Co-organizer of the JCMT 2022 Users Meeting. Chair for one session.
- 2019-2020 Co-mentor of two short-term visiting students at CfA.

Publications (ADS link)

8 first-author papers (including an invited review) with 105 citations. 28 total publications with 566 citations.

First-Author Papers (ADS link)
